## CITYMAKERS GLOBAL VILLAGE MAP

City-making means building belongingness, not just houses. Be it in China or Europe, the ability to create communities (both spatial and social) is the 'currency' that lies at the heart of livable cities. Five years after the development of the CITYMAKERS China-Europe program, an ecosystem of places and spaces for the exchange and testing of new models of livable cities has emerged across cultural, disciplinary and national boundaries. In these transformation hubs peers of the CITYMAKERS network act as catalysts for change, sharing solidarity, inspiration and friendship. Join and partner up with the CITYMAKERS global village network to boost its relevance!
